EDUCATION

Indian Institute of Technology Kanpur

Bachelor's, Earth Science

2020–2024

EXPERIENCE

BuiltX SDC

May 2024 - Present

Full Stack Developer

Construction E-commerce Platform (CoPro)

- Stabilised a production-scale Next.js application by diagnosing and resolving critical startup & rendering issues
- Resolved authentication and session-management failures across Firebase, Apollo Client, and GraphQL services
- Initiated a phased backend migration to Node.js & MongoDB to improve scalability and system maintainability
- Reverse-engineered old app workflows and system dependencies to support debugging & backend migration
- Implemented backend APIs and business modules as part of an ongoing platform modernization initiative

Business Website with Admin CMS

- Built a MERN app with JWT authentication, role-based access control, and end-to-end content management
- Designed REST APIs using Node.js, Express.js, and MongoDB to support secure admin and public data flows
- Developed responsive React.js interfaces and an admin dashboard to deliver production-ready web experiences

10x Academy

Jan 2023–Jul 2023

Programming Mentor Intern

Data Structures and Algorithms Mentorship

- Conducted sessions on Data Structures & Algorithms, guiding in complexity analysis and optimal solution design
- Reviewed and debugged code to identify logical flaws and inefficient algorithms, reinforcing clean coding practices

PROJECTS

Parking Lot Management System

Mar 2026–Apr 2026

C++, Object-Oriented Design, Low-Level Design

- Designed a parking management system applying low-level design principles with clear separation of responsibilities
- Applied the Strategy Pattern and smart pointers to improve extensibility, maintainability, and memory safety
- Optimised parking and exit operations to O(1) time complexity using hash-based indexing for efficient vehicle lookup and allocation

Algorithm Visualizer

May 2025–Sep 2025

React.js, Node.js, MongoDB, REST APIs

- Built an interactive full-stack app that visualizes algorithms in real time using React.js, Node.js, and MongoDB
- Integrated REST APIs with a reusable tracer engine to capture algorithm states and support scalable visualizations
- Implemented and tested visualization workflows across multiple algorithms to ensure consistent behavior
- Improved application performance by optimizing state updates and minimizing unnecessary component re-renders

AI Content Automation Platform

Apr 2025–May 2025

Gemini API, Firebase Studio, JavaScript

- Built an AI-assisted content automation platform using Gemini APIs with complete content generation workflow
- Designed multi-step prompt pipelines and agent-style workflows to orchestrate end-to-end content creation, demonstrating practical experience with modern AI models and application-layer automation

Computer Vision using TensorFlow

May 2022–Jul 2022

Python

- Trained and optimized a CNN-based TensorFlow classifier by preprocessing 9,000+ images for mask classification
- Improved model generalization to 98% accuracy by tuning hyperparameters and validating across train/test splits

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript

Frontend: HTML, CSS, React.js

Backend and Database: Express.js, Node.js, MongoDB, MySQL

Tools: GitHub, Postman, Figma, Git, Webflow, Cursor

Concepts: Data Structures & Algorithms, Object-Oriented Design, REST APIs

ACHIEVEMENTS & EXTRACURRICULARS

- Awarded 4 times with **Gold Medal** for exceptional performance in academics from class 8 onwards
- Volunteered in Prayas at IIT Kanpur, teaching underprivileged children through structured weekly sessions
- Led election operations at IITK, coordinating teams and resolving real-time issues to ensure smooth voting
- Solved 200+ Data Structures & Algorithms problems to strengthen problem-solving and coding skills
