Acme Industries Limited, Q2 FY27 earnings conference call, 20 October 2026.
Moderator: Good evening and welcome to the Acme Industries Q2 FY27 earnings call.
Rahul Mehta, Managing Director: Thank you. Our strategy is to deepen our presence in specialty chemicals where we have a cost advantage from our integrated plants.
Our integrated plants at Dahej give us a cost position that competitors find hard to match, and long-term contracts with our top ten customers protect volumes.
Revenue for the quarter grew 14 percent year on year to 4,820 crore rupees, driven by volumes in the specialty segment.

Anita Rao, Chief Financial Officer: EBITDA margin improved to 21.5 percent from 19.8 percent a year ago as raw material prices softened.
We expect margins to stay in a range of 20 to 22 percent for the rest of the year, subject to crude oil prices.
On capital expenditure, we plan to spend 1,200 crore rupees this year on the new Dahej expansion, funded largely from internal accruals.
Net debt to EBITDA stands at 0.8 times and we repaid 300 crore rupees of borrowings during the quarter.
The board has declared an interim dividend of 6 rupees per share for the year.

Analyst, Brokerage One: Can you explain what is driving the order book, and how worried should we be about Chinese imports?
Rahul Mehta: The order book stands at 3,900 crore rupees, up 18 percent from the last quarter, and enquiries from European customers have increased.
Chinese imports remain a risk to pricing in two product lines and we are watching anti-dumping duty decisions closely.
Analyst, Brokerage Two: What is your thinking on acquisitions and the share buyback?
Anita Rao: We are not planning a share buyback this year, and we will consider small acquisitions only if they add to our specialty portfolio.
Moderator: Thank you. That concludes the call.
